

KISHAN KOKAL

Software Developer

Mumbai, Maharashtra | +91-9920594378 | kokalkishan.official@gmail.com

CAREER SUMMARY:

Experienced Software Developer with a strong background in full-stack development, experienced in working at a stealth mode startup and on freelance projects

WORK EXPERIENCE:

Stealth Startup, Remote

Software Developer Intern | March, 2024 - April 2024

- Was building an ONDC based e-commerce platform.
- Was a part of the founding developer team.
- Developed and implemented a robust CI/CD pipeline using GitHub Actions for hosting
- Docker containerised services on AWS ECS with EC2.
- Developed backend services using ExpressJS.
- Developed and executed a comprehensive test suite using Cypress to ensure the functionality of a web application. Specifically, created tests to assess text overlaps.

RELEVANT PROJECTS:

BlogGenie (blog-genie.vercel.app)

Freelance | April, 2024

- Built BlogGenie, a RAG application using Express.js and GPT-3.5 Turbo API to assist with blog writing.
- Implemented Retrieval Augmented Generation with MongoDB for relevant content suggestions.
- Enabled continuous deployment and secure user access with Clerk.
- Utilized Django REST framework for a separate document loader service.

Digital Avatar of Hemen Parekh (hemenparekh.ai)

Freelance | September, 2023 - November, 2023

- Rewrote the application, transitioning it from JQuery to React and crafting a single-page application (SPA) to enhance the overall user experience.
- Deployed the application on a VPS server.
- Implemented socket.io for real-time visitor tracking, creating a lively and interactive platform.
- Enabled compatibility with 26 languages, including both Indian and global languages, by integrating Google's text-to-speech API.
